Age verification

Instant connection of new customers by own company AVS webcam system

A unique position feature of Live-Strip.com concerns the customary awkward point of age verification. Owing to youth protection obligations in Germany the obligatory legal age confirmation normally causes dramatic losses in turnover.

Complicated and lengthy policies have deterred many potential new customers.

But this is not the case with Live-Strip.com ...

Age verification via Webcam

In order to achieve a quick, free and straightforward connection, the user only needs his own Webcam. Using an own-developed, special method, the new customer is able to run through the statutory specified age verification in just a few minutes and can, within a short time, gain access to all the contents. Inspection is made by specially trained staff at our company – 24 hours a day!

Here is the best bit: Live-Strip.com is the only provider to offer these to users, partners and other AVS Services free of charge.
